WORDPRESS DEVELOPMENT

Horizon Tech Services

2022 - Present Rawalpindi

- Manage Deep Learning Pipelines: Design and implement efficient deep learning model pipelines using Python libraries (PyTorch). Extract and process outputs from models given diverse data sources to support predictive and analytical tasks.
- Data Preprocessing and Feature Engineering: Apply advanced data preprocessing and feature engineering techniques to optimize model performance.

Devlance Technologies

2018 - 2021 Lahore

- Design and Implement Websites: Utilize PHP, HTML, CSS, and JavaScript to create and customize themes and plugins.
- Optimize Site Performance: Conduct site evaluations to enhance loading times, responsiveness, and cross-browser compatibility.

EDUCATION

Master's Computer Science

Riphah International University

2019 - 2021

SKILLS

Python

Django / Django Channels

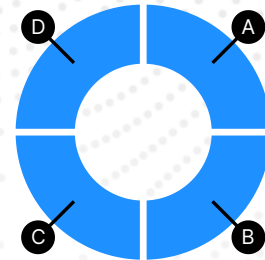

NLP Pipeline Handling

Docker Services

Bootstrap / Html css

Flask Framework

MY TIME

- A Tech Enthusiasm
- B Bike Travelling
- C Sports
- D Learn new Technologies

PASSIONS

Demonstrated passion for continuous learning and self-improvement, with a proven track record of acquiring new skills and knowledge with intense focus and dedication.

Thrives in challenging environments, viewing difficult situations as opportunities for growth and innovation.
